

Management Requirements of China Compulsory Certification Certificate

According to the Regulations of the People's Republic of China on Certification and Accreditation, Regulations for China Compulsory Certification, and Management Measures on Certification Certificate and Mark, CNCA stipulates the following requirements for the content, format, making and use of the CCC certificate (hereinafter referred to as the "Certificate").

I. Certificate Content and Format

1. Content on the Certificate's Main Page

(1) The Certificate's main page shall include but not limited to the certification mark; name and number of the Certificate; name and address of the certification applicant; name and address of the manufacturer; name and address of the factory; products' names, series, specifications, and models; product standards and technical requirements of certification; implementation rules for certification; date of issuance and validity; QR code for certificate query; and information of the certification body.

A. The Certificate name shall be "China Compulsory Certification Certificate";

B. Typically, the Certificate number consists of 16 digits, and the numbering rules are as follows:

1-4 digit	5-6 digit	7-10 digit	11-16 digit
XXXX 	XX 	XXXX 	XXXXXX 
Year of issuance	Number of designated certification body	Code of product category	Certificate sequence number
Note: 1. Please see the Announcement of Designated Certification Bodies for the number of designated certification body; 2. Please see the <i>China Compulsory Certification Catalog</i> for the code of product category.			

For the Certificate issued by using special modes or methods (such as single-batch certification, single-vehicle certification, and pilot free trade zones), its number in addition to referring to the aforementioned numbering rules will add 17-18 digit using special marks representing corresponding special mode or method. Special marks are stipulated in the documents issued by the CNCA (such as the certification implementation rules).

C. QR code for certificate query is linked to the certificate query system of the issuing

authority. Upon scanning the QR code, the Certificate information and status (such as suspension, cancellation or revocation), as well as reasons and the time of status change shall be directly displayed.

(2) According to the special requirements for the content of the Certificate specified in the CCC certification rules for the specific product, or the needs of the designated certification body, the Certificate can include version number, the number of changes, certification model, the certification body logo, certification logo (CCC certificate status) and others on its main page.

2. Content on the Certificate's appendix

When the Certificate's main page contains a lot of information, such as multiple product names, series, specifications and models, names and addresses of manufacturers, or other description of the product that needs to be included, the designated certification body can attach an appendix to the Certificate, and mark "see the appendix" in the corresponding place of the main page.

The Certificate's appendix shall also encompass the Certificate number, information of the issuing authority and page numbering. It shall be noted that the appendix is intended to be used in conjunction with the main page concurrently.

3. Certificate Format

The specific format is detailed in the annex.

II. Certificate Making

The content and format of the Certificate made by the designated certification body shall meet the above requirements. Electronic certificates shall also comply with the Electronic Signature Law of the People's Republic of China and other laws and regulations, as well as the national standards, and certification and accreditation industry standards related to electronic certificates. For the Certificate in hard copy, the content and format shall be consistent with the electronic one while the paper quality shall be no less than 120 g/square meter.

III. Use of the Certificate

Certified organizations (including certification applicants, manufacturers and factories) shall use the Certificate correctly in accordance with relevant laws and regulations. Since the date of cancellation or revocation of the Certificate, or during the suspension period, products that fail to meet the certification requirements, shall not be manufactured, sold, imported, or used in any other commercial activities.

When certified organizations require additional certificate in other languages, the designated certification body can provide translation of the Certificate. However, the translated documents do not have legal effect and shall not be used independently.

IV. Management of the Certificate

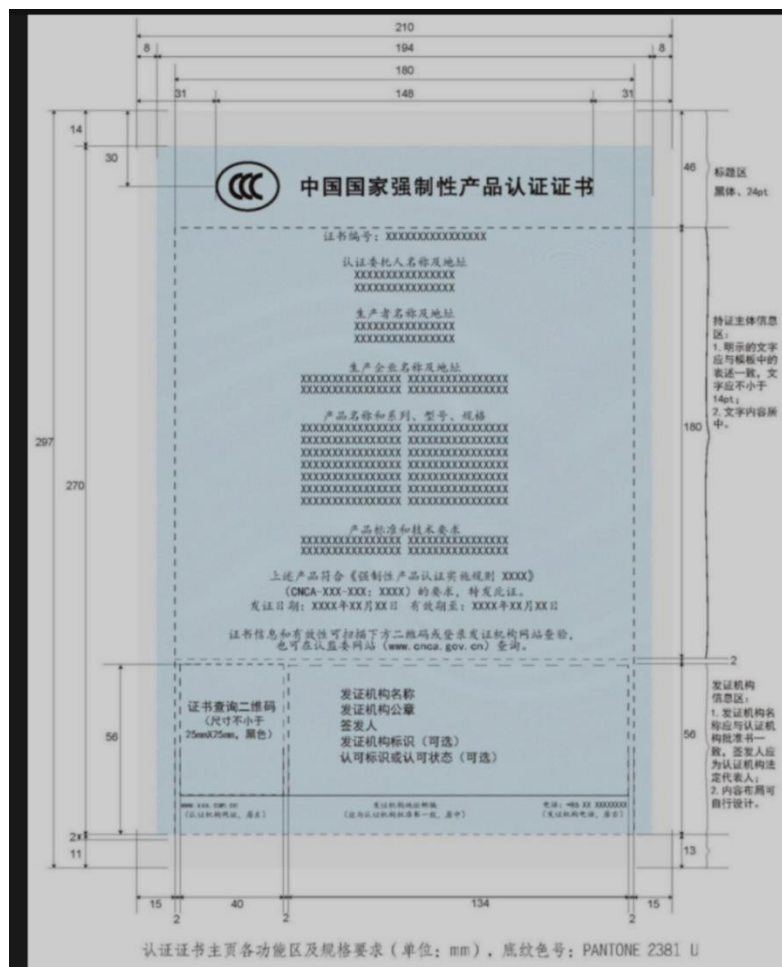

The designated certification body shall establish a management system for CCC certificates, and truthfully record and archive the making, printing and issuance of the Certificate.

The designated certification body shall guide the certified organization in the proper use of the Certificates and conduct inspections on their use of the Certificate in the post-certification supervision.

Market regulation departments at all levels in conjunction with the supervision and inspection of CCC certification shall inspect the use of the Certificate within their jurisdiction. Any unlawful activity shall be investigated and dealt with in accordance with the laws.
